

Figure 1

Western blot analysis of ataxin-1 and TBP in SCA10 and SCA1. The blot shows protein bands for ataxin-1 (202K, 133K, 100K) and TBP (71K, 38K) across four lanes: SCA, Contr, SCA10, and SCA1. Molecular weight markers are indicated on the right.

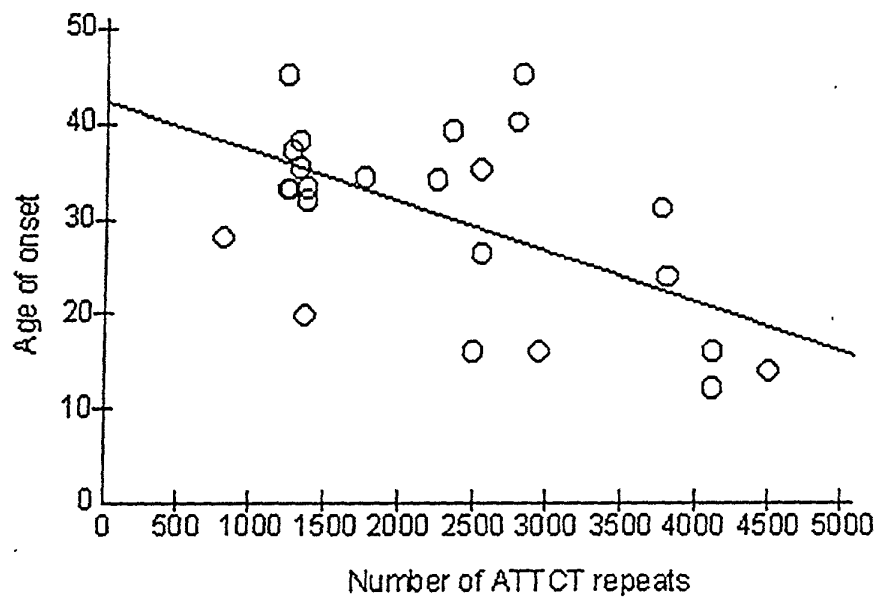

Figure 6

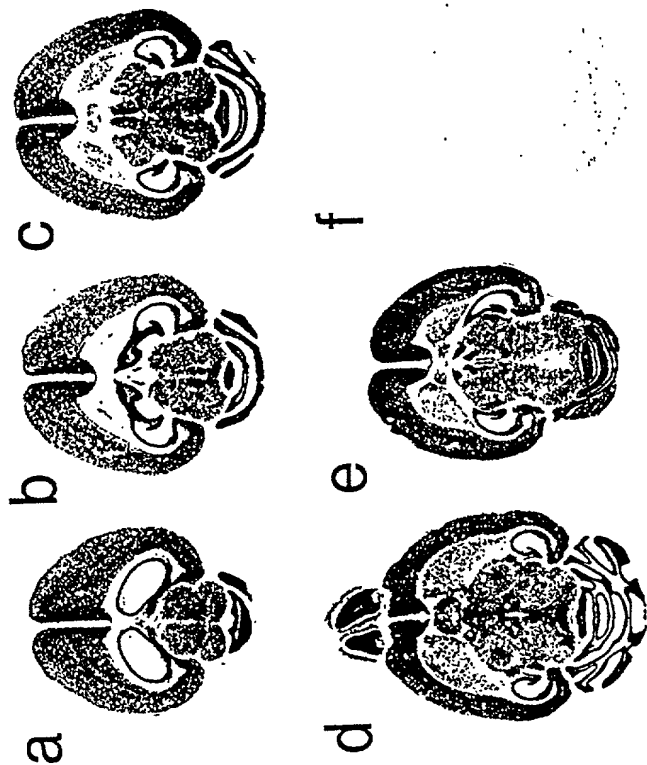

Figure 7

Genomic tracks for SCA10 and a 2.0kb region. The SCA10 track shows a large deletion in the patient sample (bottom) compared to the control (top). The 2.0kb track shows the genomic context of the deletion.
